

## CLADDING TO SHAPE YOUR ROOM

Have you chosen a stûv 21 or stûv 30-in? A wide range of cladding is compatible with these two stoves to show them off. Subtle, stylish lines adapt to all kinds of interior.

**You cannot carry out fitting work.  
 You haven't left a recess...**

Stûv is offering ready-to-fit metallic cladding that allows stoves to be installed without major work.

**Finish of your choice**

This cladding is available in anthracite gray, white or coated with a primary paint that you can spray in the colour of your choice. There is also a metal rust-coloured version. This effect is obtained by natural oxidation of the metal in an outside environment. The process is stopped when an attractive rust-coloured surface appearance is obtained. Every unit produced is therefore unique.

++++  
**Possible combinations**

There is a wide range of solutions available adapted to your interior – with one or two wood storage units or without one, symmetrical or asymmetrical, wide or narrow.

**The frames**

They attach to the stûv21 stove avoiding finishing work. Some frames and cladding integrate with air convection and distribution systems.
