

WOOD FIRE GRILLS... ALL YEAR ROUND!

To enjoy the friendly atmosphere of summer barbecues all year round, Stûv has designed an innovative accessory that will allow you to create the same atmosphere around your living room fire.

+++++

Healthier:

Unlike the traditional barbecue, with the Stûv grill the food is not placed over the embers but in front of the flames. The food is cooked by radiation and there is no danger of it being carbonised by drops of fat that blaze up as they fall into the fire.

+++++

Fast:

- >> Cooking is fast. Red meat is easily seared, for example.
- >> There is no need to wait for glowing embers to develop.
- >> The grill is fitted into the fireplace in an instant (even when burning).

+++++

No smell of cooking:

The chimney draught sucks in all the cooking odours. That way they do not waft through your home.

+++++

Clean:

The dripping pan prevents any cooking fat from falling onto the floor. The grill and dripping pan can both be cleaned in the dishwasher.

+++++

Accessory available for **Stûv 21** stoves with a retractable door and for **Stûv 30** and **Stûv 30-in** cylindrical stoves.

+++++

Price:

Around €150 excl. VAT
(list of nearest distributors available at www.stuv.be)
